

Problem set 1

From the numbers of this unsorted array: [20, 21, 25, 28, 33, 34, 35, 36, 41, 42], the 7 is divisible 4 times.
From the numbers of this unsorted array: [18, 54, 76, 81, 36, 48, 99], the 9 is divisible 5 times.

Problem set 2

The minimum absolute gap from this array: [50, 120, 250, 100, 20, 300, 200] is 20.
The minimum absolute gap from this array: [12.4, 45.9, 8.1, 79.8, -13.64, 5.09] is 3.01.

Problem set 3

The product of the two matrices [[2, 7], [3, 5]], [[8, -4], [6, 6]] is:

[58, 34]

[54, 18]

The product of the two matrices [[1, 0, 2], [3, -2, 5], [6, 2, -3]], [[0.3, 0.25, 0.1], [0.4, 0.8, 0], [-0.5, 0.75, 0.6]] is:

[-0.7, 1.75, 1.3]

[-2.4, 2.9, 3.3]

[4.1, 0.85, -1.2]
